Institutional/bulk discounts for ten or more tests are available. Please call 910-678-7216 for more information.

#### Purpose of this educational activity:

Lions and Tigers and Nurses is an educational fiction novella (short novel) about lateral violence in nursing culture. Through a fiction story, readers will meet a cast of 5 nursing characters at a hospital's Med-Surg unit. The newest nurse on the unit, Haylie, is paired with preceptor Miriam, the most senior nurse on the unit. The relationship between the two nurses is high-conflict and marked by a number of laterally violent behaviors. The nurse manager, Donna, realizes that an intervention is needed and sends her team of nurses to a program on lateral violence. Together, the nurses learn about the history of lateral violence in nursing, the top ten behavioral manifestations of lateral violence, and interventions to reduce and stop lateral violence in the workplace. Self-study and reflective book discussion group questions are included in the story to validate learning.

#### Learning Objectives:

Upon completion of this educational activity, the participant should be able to:

- 1) Define lateral violence
- 2) Discuss why lateral violence occurs among nurses
- 3) List the top ten behavioral manifestations of lateral violence in the workplace
- 4) Identify evidence-based verbal responses to laterally violent behaviors
